Hi again,
 It was brought to my attention (thanks [REDACTED] & Mindy!) that the rodents need to be broken out by species, so I have attached the workbook again with a 3rd tab for rodents.
 Let me know if you have questions.
 Tammie

Dear team,

I have attached a workbook that lists the countries with human data as well as a second list by country/taxa/age classes of all animals in EIDITH. If you feel your teams didn't categorize the age classes correctly, please send us a list of the changes you want to make in excel and we will update EIDITH for you.
 I have also included today's indicator report below.

Indicator	Total	NewInLast2Weeks
# countries with data	30	0
# animals sampled	57141	570
# humans sampled	7727	214
# specimens	328384	5006
# tests	209795	8965
# animals tested	20000	
# humans tested	1774	
# animal specimens tested	35992	
# human specimens tested	3015	
# human specimens tested	3015	
# tests active testing ongoing	1617	
# sequences interpreted	1122	
# tests waiting interpretation	327	
average days between event and data submission	76	
average days between event and data submission for data submitted in last 2 weeks	40	
number of events/test batches waiting for country input	11	
number of events/test batches waiting for IM review	6
